## **AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims:**

1-3 (canceled).

4 (previously presented). A polynucleotide comprising a fragment of SEQ ID NO: 2 or a fragment having at least 80% sequence identity to a fragment of SEQ ID NO: 2, wherein said polynucleotide in the absence of inverted terminal repeat sequences from human adeno-associated virus specifically induces expression in cardiac cells *in vivo* of a gene which is operably linked to said polynucleotide.

5 (original). An expression cassette comprising a sequence encoding a protein or an RNA of therapeutic interest operably linked to the polynucleotide according to claim 4.

6 (canceled).

7 (original). The expression cassette according to claim 5, wherein the protein or RNA of therapeutic interest increases a rate of cardiac cell division, reduces or suppresses an immune response, induces angiogenesis, changes muscle contractility, reduces cardiac hypertrophy, reduces cardiac insufficiency, or reduces myocarditis.

-2-

PATENT Application No. 10/005,337 Attorney Docket No. 08888.0530-00000

8 (canceled).

9 (original). The expression cassette according to claim 5, wherein the protein or RNA of therapeutic interest is a vascular endothelial growth factor, a fibroblast growth factor, an angiopoietin, or a cytokine.

10 (canceled).

11 (original). The expression cassette according to claim 5, wherein the protein or RNA of therapeutic interest is an activating or an inhibiting transcription factor.

12-13 (canceled).

14 (original). The expression cassette according to claim 5, wherein the protein of therapeutic interest is an immunosuppressive protein.

15 (original). The expression cassette according to claim 14, wherein the immunosuppressive protein is interleukin-10, interleukin-2, or interleukin-8.

16 (canceled).

PATENT Application No. 10/005,337 Attorney Docket No. 08888.0530-00000

- 27 (original). The vector according to claim 21, which is a plasmid or a cosmid.
- 28 (canceled).
- 29 (original). The vector according to claim 21, which is or is derived from an adenovirus, a retrovirus, a herpesvirus, or an adeno-associated virus.
- 30 (canceled).
- 31 (original). A composition comprising a therapeutically-effective amount of the polynucleotide according to claim 4 and a pharmaceutically-acceptable carrier.
- 32 (canceled).
- 33 (original). A composition comprising a therapeutically-effective amount of the vector according to claim 21 and a pharmaceutically-acceptable carrier.
- 34 (withdrawn). A transgenic nonhuman animal comprising a reporter gene operably linked to the polynucleotide according to claim 1.
- 35 (withdrawn). A transgenic nonhuman animal comprising a reporter gene operably linked to the polynucleotide according to claim 4.

PATENT Application No. 10/005,337 Attorney Docket No. 08888.0530-00000

36 (withdrawn). A method for expressing a protein or an RNA of therapeutic interest in cardiac cells *in vivo*, comprising

- preparing a vector according to claim 22, and
- introducing said vector into cardiac cells *in vivo* so that said protein or RNA of therapeutic interest is expressed.

37 (withdrawn). A method for expressing a protein or an RNA of therapeutic interest in cardiac cells *in vivo*, comprising

- preparing a vector according to claim 23, and
- introducing said vector into cardiac cells *in vivo* so that said protein or RNA of therapeutic interest is expressed.

38 (canceled).

39 (original). The vector according to claim 21, which is any DNA not encapsidated by viral proteins.
